

## **SID Data Removal – TSDL Reporting**

### **Background**

Historically, School Infrastructure Database (SID) data have been used to report the counts of students participating in dual enrollment. As of the 2016-17 school year, these data are now submitted through the Teacher Student Data Link (TSDL) Collection in the Michigan Student Data System (MSDS). These data fields have been retired from the SID.

### **Reporting Changes for This School Year (2016-17)**

Beginning with the 2016-17 TSDL Collection, the "College Credit" and "Credits Granted" characteristics in the Student Course component must be reported as follows for dual enrollment courses:

1. **"Credits Granted"** should be reported when only high school credit is awarded.
2. **"College Credit"** should be reported when only college credit is attempted.
3. **"Credits Granted" and "College Credit"** should be reported when both high school credit is awarded and college credit is attempted for dual enrollment participants.

Continue to use course type "07" unless the course qualifies for 64b funding. Business rule 252.572.1 (college credit can only be submitted when the course type is "10") has been changed to a warning so that the "College Credit" characteristic can be used to report all college credit, not just credit for 64b funding.

### **64b Reporting in TSDL**

Section 64b incentive legislation is for students whose course enrollment results in both high school and college credit earned. Report them with Course Type "10" (64b Dual/Concurrent Enrollment Course). Additionally, when reporting the course in TSDL, you must complete all required characteristics, including College Credit and Completion Status. CEPI recommends that you wait until the course is completed to report the course in TSDL to ensure you can claim the maximum amount of 64b funds. As a reminder, each UIC is only eligible to receive funds up to 3 credit hours, but only one course will receive the funding. If multiple courses are submitted, the course with the most credits and a passing completion status will be approved.

### **What's Next**

With the transition of reporting dual enrollment course information from SID to TSDL, additional business rules and updates to the 2017-18 MSDS Collection Details Manual will be made.

CEPI is also adding data quality checks to cross reference the TSDL Collection and the Student Transcript and Academic Record Repository (STARR) Collection. The

checks will verify whether a dual-enrolled student is reported in both TSDL and STARR.

Please pay close attention to upcoming CEPI announcements for further updates.

If you have any questions, please send an email message to the CEPI customer support team at [CEPI@michigan.gov](mailto:CEPI@michigan.gov), or call 517-335-0505 x3. Please provide your name, district code and district name (if applicable), telephone number (including area code and extension), your email address and your specific questions.
